Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 May 2005.
2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This action is issued in response to applicant's amendment filed 5/18/05.
2. Claims 2-4 are pending.
3. Applicant's arguments filed 5/18/05 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2, and 3, are rejected under 35 U.S.C. as being anticipated by Yener (US Patent No. 6,772,337).

Regarding Claim 2, Yener discloses a data managing system, comprising:

a client unit which a user uses to request for data; an agent unit which saves encrypted document data and attributes information (Col. 11, lines 7-10, Yener);

Art Unit: 2161

a document managing unit which executes user authentication, access control and document image edition by means of decrypting of encrypted document data (Col. 11, lines 57-67, Yener);

wherein each said unit has a processing function and an interface function which are independent of each other, and are connected via a communication network (Col. 11, lines 44-56, Yener).

Regarding Claim 3, Yener discloses a data managing system, wherein said client unit and the agent unit which saves document data used by a user of said client unit are housed in a user terminal (Col. 13, lines 54-58, Yener¹), and said document managing unit is disposed at a different location which is on-line connected (Col. 13, lines 59-66, Yener).

Allowable Subject Matter

Claim 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: document data have an output image in which a plurality of lines of particulars data are described between a predetermined page header and page footer, a necessary multi-layer hierarchical index file is constructed which contains a lowest-order index file formed by said page header, said page footer and storing location data of said particulars data, a higher-order index file formed by index

Art Unit: 2161

keys, index items and said storing location data of said lowest-order index file by blocking said lowest-order index file, and a further higher-order index file formed by blocking said upper index file, and in response to a data request from said client unit, lower-order index files are sequentially specified from said higher-order index file by means of transactions between said client unit and said document managing unit, whereby data requested by a user are specified and provided.

Response to Arguments

Applicant's argues that the prior art fails to disclose the "data managing unit" "an agent unit that saves encrypted document data" nor "an agent that saves attribute information with encrypted document data."

Examiner disagrees. Referring to Col. 9, lines 31-38, Yener disclose the data management by arranging the data in blocks. And by referring to Col. 10, lines 35-42, Yener discloses the limitations argued above, by utilizing a secret key to encrypt the block since the secret key is used to hide the content of data.

Applicant argues that the Yener fails to disclose "data managing unit which executes user authentication".

Examiner disagrees. Referring to Col. 10, lines 38-39, Yener discloses providing the secret key to the client, which corresponds to accessing the data-managing unit. And referring to Col. 4, lines 29-35, Yener discloses providing authentication to the users.

¹ The Examiner interprets the step of matching REP corresponds to housed since client can not match any

Art Unit: 2161

Applicant argues that the Yener fails to disclose the client and agent units are housed in a user terminal.

Examiner disagrees. The client and agent unit can be stored at the client terminal in the ROM as disclosed in Col. 3-4, lines 65-67, and 1-11.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
